

# **COMMUNITY INVOLVEMENT PLAN**

**FALCON REFINERY SUPERFUND SITE  
INGLESIDE, SAN PATRICIO COUNTY, TEXAS**

**April, 2013**

**U. S. ENVIRONMENTAL PROTECTION AGENCY  
REGION 6**

THE U. S. ENVIRONMENTAL PROTECTION AGENCY'S (EPA)  
SUPERFUND COMMUNITY INVOLVEMENT PROGRAM IS COMMITTED  
TO PROMOTING COMMUNICATION BETWEEN CITIZENS AND THE AGENCY.

ACTIVE PUBLIC INVOLVEMENT IS CRUCIAL TO THE SUCCESS OF ANY PUBLIC PROJECT.

EPA'S COMMUNITY INVOLVEMENT ACTIVITIES AT THE  
**FALCON REFINERY SUPERFUND SITE**

ARE DESIGNED TO

INFORM THE PUBLIC OF THE NATURE OF THE ENVIRONMENTAL ISSUES ASSOCIATED WITH  
THE SITE,

INVOLVE THE PUBLIC IN THE DECISION-MAKING PROCESS THAT WILL AFFECT THEM,

INVOLVE THE PUBLIC IN THE RESPONSES UNDER CONSIDERATION TO REMEDY THESE  
ISSUES, AND

INFORM THE PUBLIC OF THE PROGRESS BEING MADE TO IMPLEMENT THE REMEDY.

## **Section 1.0**

### **Overview of the Community Involvement Plan**

The U.S. Environmental Protection Agency (EPA) developed this Community Involvement Plan (CIP) to facilitate two-way communication between the community surrounding the Falcon Refinery Superfund Site (Hereinafter the “Site”, also known as National Oil Recovery Corporation) and the EPA and to encourage community involvement in site activities. EPA will utilize the community involvement activities outlined in this plan to ensure that residents are continuously informed and provided opportunities to be involved.

This CIP addresses the Site’s relationship to the community and EPA (Section 2.0), provides a background of the community (Section 3.0), presents EPA’s community involvement program (Section 4.0), and provides a listing of resources available (Appendices). EPA drew upon several information sources to develop this plan, including community interviews and site files. EPA’s Regional Office will oversee the implementation of the community involvement activities outlined in this Plan.

## **Section 2.0**

### **Site Background and Description**

#### **2.1 Site History**

The Site consists of an abandoned refinery that has operated intermittently since 1980. When in operation, the refinery operated at 40,000 barrels per day capacity with primary products consisting of naphtha, jet fuel, kerosene, diesel, and fuel oil. The refinery processed material that consisted not only of crude oil but also hazardous substances.

#### **2.2 Site Description/Location**

The Site occupies approximately 104 acres and is approximately five feet above sea level. Its location is 1.7 miles southeast of State Highway 361 near the intersection of FM 2725 and Bishop Road near Ingleside, Texas. Ingleside is approximately 18 miles northeast of Corpus Christi. The Site is located in the San Antonio-Nueces Coastal Basin adjacent to Redfish Bay, which connects Corpus Christi Bay to the Gulf of Mexico.

The Site is bordered by residential areas to the north and southwest, an abandoned refinery to the northwest, a construction company to the southwest, and wetlands to the northeast and southeast. Surface drainage water from the Site enters the wetlands along the southeastern section through a culvert that connects the onsite **palustrine/estuarine** wetlands to off-site estuarine wetlands. The wetlands then connect to the Intracoastal Waterway and Redfish Bay.

#### **2.3 Site Inspections and Cleanup Activities**

In May, 2000, the Texas Natural Resource Conservation Commission (now the Texas Commission on Environmental Quality) conducted sampling activities at the Site and documented the following hazardous substances: cyclohexane, methlycyclohexance,

toluene, ethylbenzene, xylenes (totals), fluoranthene, pyrene, benzo(a)anthracene, chrysene, benzo(b)fluoranthene, benzo(k)fluoranthene, benzo(a)pyrene, ideno(1,2,3-cd)pyrene, benzo(g,h,i)perylene, aluminum, arsenic, barium, cadmium, chromium, copper, lead, manganese, mercury, nickel, selenium, thallium, vanadium and zinc.

The findings of an Expanded Site Investigation, completed in November, 2000, revealed releases from the Site of the following hazardous substances: fluoranthene, pyrene, benzo(a)anthracene, chrysene, benzo(b)fluoranthene, benzo(k)fluoranthene, benzo(a)pyrene, ideno(1,2,3-cd)pyrene, benzo(g,h,i)perylene, dibenz(a,h)anthracene, barium, manganese and mercury.

The media affected are sediments in the Redfish Bay fishery and contiguous wetlands and on-site soils. The following hazardous substances were documented in sediments obtained in Redfish Bay and nearby wetlands at elevated concentrations that require further investigation: fluoranthene, pyrene, benzo(a)anthracene, chrysene, benzo(b)fluoranthene, benzo(k)fluoranthene, benzo(a)pyrene, ideno(1,2,3-cd)pyrene, benzo(g,h,i)perylene, barium, manganese, and mercury.

The volumes of wastes currently present at the Site have not been determined. This information will be obtained during the Remedial Investigation and Feasibility Study currently being planned for the Site.

## **Section 3.0**

### **Community Background**

#### **3.1 Community Profile**

The Community within 1 square mile of that site has a population of 126 and is 36.5% minority, 12.1% economically stressed, and has an Environmental Justice Index of 1. The Community within 50 square miles of the site has a population of 17,242 and is 37.4% minority, 24.8% economically stressed, and has an Environmental Justice Index of 4.

Ingleside, Texas, known as “The Gateway to the Islands”, is located 18 miles north of Corpus Christi, Texas, in San Patricio County. The population of Ingleside is approximately 9,388, and the population of San Patricio County, as of the 2010 Census, is approximately 64,804. Ingleside continues to be the fastest growing community in the county. Its unprecedented growth can be attributed to the U.S. Navy’s choice of Ingleside as a home-port, industry expansions, the increased popularity of “Ecotourism” such as the Great Texas Coastal Birding Trail, the growing retirement community, and people relocating. Additionally, approximately 6 million tourists visit the Coastal Bend each year. Peak tourist months are June and July; but, because of the sunny climate, visitors are present all year long.

The local demographics are as follows. The following figures are only estimates.

<b>Ethnicity</b>	<b>Population</b>
<b>Caucasian</b>	<b>53.5%</b>
<b>Hispanic</b>	<b>40.8%</b>
<b>Asian Alone</b>	<b>2</b>
<b>African-American</b>	<b>1.7%</b>
<b>Native American</b>	<b>0.4%</b>
<b>Pacific Islander</b>	<b>.07%</b>
<b>Other Races</b>	<b>.10%</b>
<b>More Than One Race</b>	<b>1.4%</b>

### **3.2 History of Community Involvement**

Door-to-door community interviews were conducted by the EPA on October 15-16, 2002, to help identify the local community's concerns and their knowledge about the Site in order to determine what information was needed to keep them more informed. The EPA also met with the City Managers for Corpus Christi and Ingleside on October 15 and 16, 2002, respectively. Community meetings were held on September 16, 2004 and December 5, 2007.

### **3.3 Key Community Concerns and Responses to those Concerns**

Community members in the vicinity of the Site, who were interviewed, shared many concerns regarding the abandoned refinery and associated tanks. There were complaints from members of the community about foul smells from the refinery and tank area. They stated that the smells were often so strong that it is believed they were the cause of nausea and sometime stomach pain and illnesses. Aside from the mentioned effects from the smell, several community members had additional health concerns that they believed were Site-related. At least three sets of parents were concerned because they believed their children's frequent illnesses were Site-related.

Almost all of the community members interviewed raised concerns about water quality around the Site. Residents stated that some well water tasted like oil, some tasted bad but not specifically like oil, some had a yellowish color and smelled badly. Only one resident interviewed, who still used well water, did not have complaints about the quality of the water. Most residents in the area who depend on well water bought bottled water for drinking or were considering connecting to the city's water source.

Additional community concerns were about frequent leaks at the refinery, oil dripping out of tanks, and that the leaks were not properly cleaned up. Several community members cited instances in which oil from leaks at the Site was pumped into the wetland and residential area northeast of the site across Bishop Road. One resident in that area recounted one of these incidents when his front yard was covered in crude oil. Regarding upcoming cleanup activities, numerous community members were concerned about harmful vapors drifting from the Site and if actions would be taken to minimize vapors during these actions.

Community members were also concerned about the quality of the streams, wetlands, and wildlife habitat surrounding the Site. At least one resident interviewed was an avid hunter who no longer hunted in the area because he was specifically worried about the ducks and geese (that depend on the habitat around the Site) were safe to eat.

### **3.4 Summary of Communication Needs**

To ensure community concerns are identified and are provided an appropriate response, community visits will be initiated by the EPA Community Involvement Coordinator. Fact sheets in regards to site activities will also be produced to provide the community the most current information on the site. An internet website has been established to assist in providing information to the community. EPA will also maintain a toll free number available to the community to allow immediate access to the Site EPA Project Manager and Community Involvement Coordinator.

## **Section 4.0 EPA's Community Involvement Program**

The overall goal of EPA's community involvement program is to promote two-way communication between citizens and the EPA and to provide opportunities for meaningful and active involvement by the community in the cleanup process. EPA will implement the community involvement activities described below. The following plan is based on the results of the community interviews described earlier; it addresses each issue that was identified as being important to the community.

### **4.1 The Plan**

Issue 1: Keeping the public informed and up to date.

Activity 1A: Designate an EPA Community Involvement Coordinator (CIC).

- Objective: To provide a primary liaison between the community and the EPA, and to ensure prompt, accurate, and consistent responses and information dissemination about the site. In those instances where EPA's CIC may be unable to provide adequate information (such as on technical issues), inquiries will be directed to the appropriate EPA contact.

- Method: EPA will designate an EPA CIC to handle site inquiries and serve as a point of contact for community members. The CIC is appointed by the Region 6 headquarters is Jason T. McKinney. He will work closely with Brian Mueller, EPA's Remedial Project Manager for the site.
- Timing: The current CIC was designated July, 2008.

Activity 1B: Prepare and distribute site fact sheets and technical summaries.

- Objective: To provide citizens with current, accurate, easy-to-read, and easy-understand information about Falcon Refinery.
- Method: Fact sheets will be mailed to all parties on the site mailing list. In addition, copies will be available at the information repository and in various cooperating business locations in the community.
- Timing: EPA will prepare and distribute fact sheets as needed depending on site activities and community needs. There have been four Fact Sheets for the site. The dates that those fact sheets was created and mailed were March 2004, September 2005, October 2005, and November 2007.

Activity 1C: Involve students, parents, teachers through area schools.

- Objective: To educate faculty, students and their parents about the site, to invite and address their concerns regarding it, and to caution students about the site.
- Method: Address school faculty and students through visits and presentations to classroom, faculty, school assembly, or other meetings or events. Additionally, communicate with parents through take-home materials provided to the students and/or by attending and participating in PTA meetings or events.
- Timing: As community concern warrants or at least every year until the site is closed out.

Activity 1D: Provide a toll-free "800 number" for the community to contact EPA.

- Objective: To enable citizens to get the latest information available when they want it, rather than having to wait for a meeting or a fact sheet, and without incurring any cost.
- Method: EPA will activate the 800 number and publish it periodically in the local papers and in all fact sheets.
- Timing: The line is currently operational 800.533.3508.

Activity 1E: Maintain a mailing list for the Site.

- Objective: To facilitate the distribution of site-specific information to everyone who needs or wants to be kept informed about the site.
- Method: EPA had created a mailing list that includes all residences adjacent to the site, in known or suspected paths of migration, or those otherwise affected by the site. EPA will also solicit interested parties via fact sheets, newspaper articles, public meetings, public availabilities, etc.
- Timing: EPA will begin working on this mailing list immediately and will review/revise it periodically to keep it current.

Activity 1F: Establish and maintain Information Repositories.

- Objective: To provide a convenient location where residents can go to read and copy official documents and other pertinent information about the site and EPA activities.
- Method: The repository is a reference collection of site information containing the Administrative Record file, other site-specific information, the Community Involvement Plan, information about the Technical Assistance Grant program, and the general Superfund process. The Community Involvement Coordinator will work with a local contact to establish the local repository. This repository will be accessible to the physically challenged, will have copier facilities, and will be available to residents during normal business hours and at least some evening and/or weekend hours. Additional repositories may also be established, including one at the Texas Commission on Environmental Quality in Austin, TX.
- Timing: EPA established the local repository at the Corpus Christi Public Library in September, 2002. EPA will add new documents as they become available.

Activity 1G: Provide Site and Superfund information on the Internet.

- Objective: To provide key resources for searching and listing both general and specific information about Superfund and hazardous waste issues.
- Method: A Site Status Summary for this site can be found at <http://www.epa.gov/earth1r6/6sf/6sf-tx.htm>. Information about EPA and Superfund can be found at: EPA Headquarters: <http://www.epa.gov>  
EPA Region 6: <http://www.epa.gov/earth1r6>  
EPA Region 6 Superfund Division:  
<http://www.epa.gov/earth1r6/6sf/6sf.htm>  
The Proposed Plan and the Record of Decision (ROD) for the site will be on the EPA internet website once they are completed.

- Timing: Site Status Summaries are updated monthly.

Activity 1H: Provide Technical Assistance Grant (TAG) information.

- Objective: To provide resources for community groups to hire technical advisors who can assist them in interpreting technical information about the site.
- Method: EPA will provide information about the TAG program at public meetings and in site fact sheets. EPA will also provide briefing sessions to interested groups if so requested. EPA will provide TAG applications to qualified groups, and will provide assistance to the group in completing the application.
- Timing: EPA awarded a TAP to the Coastal Bend Bay Foundation on .

Activity 1I: Establish and maintain the Administrative Record.

- Objective: To provide residents with a paper trail of all documents, resources, etc. used by the Regional Project Manager and Site Team in reaching all decisions about the site and its cleanup.
- Method: EPA will provide at least two sets of the Administrative Record for the site, one in the EPA Region 6 offices located at 1445 Ross Avenue, Dallas, Texas 75202 and one located in the local Information Repository near the site.
- Timing: The Administrative Record was opened as soon as site investigation began and remains open until the last ROD is signed.

Issue 2: Provide adequate and meaningful opportunities for community involvement.

Activity 2A: Hold public meetings.

- Objective: To update the community on site developments and address community questions, concerns, ideas and comments.
- Method: Refer to Appendix H for suggested meeting locations. EPA will schedule, prepare for, and attend all announced meetings. EPA will provide at least two weeks' notice of the scheduled meeting. The Regional Project Manager, Community Involvement Coordinator, and other appropriate EPA staff will attend.
- Timing: A public meeting is required during the Proposed Plan comment period once the RI/FS is completed. EPA will hold other public meetings

as appropriate. The EPA held public meetings in September 2004 and December 2007.

Activity 2B: Encourage formation of a Community Advisory Group (CAG).

- Objective: To provide citizens with a meaningful way to become actively involved, and to provide the Site Team with a viable means of learning citizen concerns and attitudes.
- Method: EPA will encourage the formation of a CAG and provide support as appropriate to facilitate its formation. If formed, EPA will provide administrative support but will not be an active member.
- Timing: EPA will respond to any requests for help to form a CAG. As necessary, EPA will promote CAGs regularly throughout the Superfund process until one is formed.

Activity 2C: Make informal visits to community.

- Objective: To help keep community members informed about the site, while providing EPA with feedback about site activities and the community's opinions.
- Method: EPA will establish a presence in the community through informal, often unscheduled visits to talk spontaneously with local residents.
- Timing: Throughout the entire Superfund process.

Activity 2D: Community Interviews

- Objective: To get a good feel for community concerns regarding the Site.
- Method: Door to door visits and interviews with as many residents as possible.
- Timing: October 15 and 16, 2002. April 2004. Ongoing

Activity 2E: Solicit comments during a Public Comment Period.

- Objective: To give community members an opportunity to review and comment on various EPA documents, especially the Proposed Plan. This provides the citizens with meaningful involvement in the process and also provides the Site Team with valuable information for use in making decisions.

- **Method:** EPA will announce each comment period separately. Announcements will appear in local newspapers and EPA fact sheets; they will include particulars on duration, how to make comments, where to submit comments, etc. EPA may solicit comments on the following information/draft documents: draft CIP, draft summary of test results (not individual tests) and initial interpretation, preliminary findings on the RI and a list of possible remedies likely to be considered, preliminary findings of the FS and a brief summary of the leading contender for the proposed remedy, and preliminary plans for implementation and construction.
- **Timing:** Comment periods will be announced as appropriate. A comment period is required in conjunction with the announcement of the Proposed Plan and will last a minimum of 30 days. The comment period for the Proposed Plan will commence once the RI/FS has been completed and the Proposed Plan has been drafted.

Activity 2F: Prepare and issue a Responsiveness Summary.

- **Objective:** To summarize comments received during comment periods, to document how the EPA has considered those comments during the decision making process, and to provide responses to major comments.
- **Method:** EPA prepared a Responsiveness Summary as a section of the Record of Decision. The Responsiveness Summary included four sections: 1. Overview; 2. Background on Community Involvement; 3. Summary of comments received and Agency responses; 4. Remedial Design/Remedial Action concerns. All information, both technical and nontechnical, was conveyed in a manner that is easily understood.
- **Timing:** EPA will issue the Responsiveness Summary as part of the Record of Decision (ROD). The ROD will be completed once the EPA received the results of the RI/FS and completes the Proposed Plan.

Activity 2G: Revise the Community Involvement Plan (CIP).

- **Objective:** To identify and address community needs, issues, or concerns regarding the site or the cleanup remedy that are not currently addressed in this CIP.
- **Method:** The Revised CIP will update the information presented in the previous version of the CIP.
- **Timing:** EPA will revise the CIP as community concern warrants or at least every three years until the site is closed out.

Activity 3A: Provide Technical Assistance Services for Communities (TASC) information.

- Objective: A headquarters contracting mechanism that provides a resource for independent, non-advocacy educational and technical assistance to a community affected by hazardous waste sites regulated by CERCLA and RCRA. This contract service is provided to communities so they can more effectively participate in the hazardous waste cleanup process in a more expedited manner.
- Method: EPA will provide information about the TASC program at public meetings and in site fact sheets as applicable. EPA will also provide briefing sessions to interested groups if so requested. EPA will provide information on TASC contract information to qualified groups, and will provide assistance to the applicant group in completing the Statement of Work for the contract application.
- Timing: As needed

## 4.2 Time Frame Summary for Community Involvement Activities

ACTIVITY	TIME FRAME
Designate an EPA Community Involvement Coordinator (CIC)	Completed
Prepare and distribute site fact sheets and technical summaries	As needed, at least two yearly
Involve students, parents, and teachers through area schools	As needed, at least annually
Provide a toll-free "800 number" for the community to contact EPA	Currently in operation
Maintain a mailing list for the Site	Ongoing
Establish and maintain Information Repositories	Established, update as needed
Provide Site and Superfund information on the Internet	Currently available; update as needed
Provide Technical Assistance Grant (TAG) information	Ongoing
Establish and maintain the Administrative Record	Established, update as needed
Conduct special events	As needed
Hold community/public meetings	As needed
Encourage formation of a Community Advisory Group (CAG)	Ongoing
Make informal visits to community	As needed
Solicit comments during a Public Comment Period	As needed and required
Prepare and issue a Responsiveness Summary	Following public comment periods
Revise the Community Involvement Plan (CIP)	As needed, at least every 3 years

## Appendix A EPA Regional Contacts

Brian Mueller  
Remedial Project Manager  
U.S. EPA, Region 6 (6SF-RL)
